OPTIONAL DOOR EDGE PROFILES

All Homestead door styles (except Bayside, Jefferson, Metro and Seascape) are available with Classic, Shaker, or Designer edge profiles. Designer edge profile is required for glazed finishes.

HIGHLIGHTS

(shown on White paint)

Smoke

Umber

Glazed accents of Ebony, Mocha, and Taupe are available on most stained and painted Homestead door styles. Highlights of Smoke, Chocolate, and Umber are available on painted Homestead finishes.

These secondary accent colors help provide a custom-looking finish on these value-priced cabinets. In addition to a modest additional charge, these accent finishes require the selection of the Designer edge door profile on most door styles.

HOMESTEAD ADVANTAGE

Homestead cabinetry was developed as a value-priced product line by Haas Cabinet. While Haas specializes in true semi-custom styled products and price points, we recognize that the market for stock-priced cabinetry is substantial. Haas is proud to be able to meet that demand by gaining cost savings through offering more limited and focused selections of the most popular cabinet sizes, door style choices and finishes. This focus on production efficiencies is what allows Haas cabinet to offer the Homestead series at such competitive price points.

Haas Cabinet also recognizes that you may desire flexibility and flair that can often exceed a budget. That is the focus of Haas' Homestead Advantage Program. By utilizing this program, you can now get those unique pieces, while still staying in the Homestead budget on the remaining products. Having access to the complete Haas product line with thousands of cabinet choices, standard and optional features, and the almost limitless custom modification choices gives you the perfect complement to both meet your budget while satisfying the pursuit of your dream kitchen. Let Haas manufacture the specialty components and then match the doors and drawers to your Homestead kitchen to offer a seamless fit.

Custom pieces, value-priced products . . . available together from Haas.

SPECIFICATIONS

CABINET CONSTRUCTION

1. **Face frame.** All Homestead cabinets use a 3/4" thick solid hardwood front frame. Frames are grooved to accept the cabinet top/bottom and end panels, providing a sturdy, interlocking construction.
2. **Front frame joints.** Front frame joints are pinned and glued under pressure using a "blind" mortise and tenon joint.
3. **Toe kick.** Homestead base and vanity cabinets use a 3" deep by 4-1/2" tall toe kick. The toe support is lipped and glued into the end panels for extra support and strength.
4. **Nail stick.** Solid wood nail sticks in wall cabinets and plywood nail sticks in the bases are an integral part of Homestead cabinetry. These pieces provide a strong, secure and long-lasting mounting platform for cabinet installation. No particleboard strips or thin cabinet backs to "hold" the cabinets in place.
5. **Drawers.** All Homestead drawers are made of 1/2" thick maple plywood material. A 3.2MM thick hardwood drawer bottom is grooved into the box on all four edges and glued. This long-lasting construction technique provides years of trouble-free service to one of the most used components in your kitchen.
6. **Drawer joints.** All drawers are standard with dovetail joints on all four corners. These joints are glued under pressure and provide years of drawer structure reliability.
7. **Drawer guides.** Homestead drawers use side-mounted, epoxy-coated drawer guides.
8. **Adjustable shelves.** Most cabinets have adjustable shelves that allow the homeowner to select the opening sizes. In addition, a full array of unique pull-out products is available to maximize access to some hard-to-reach areas.
9. **End panels.** All Homestead ends are made of 1/2" thick material with 3/16" furniture offset on the outside. Upgrades to a 3/4" plywood end is available for exposed ends, if desired.

Full-extension under mount guides
with soft-close features

HOMESTEAD DRAWER UPGRADE

Available as an upgrade, any Homestead drawer may be changed to feature solid wood dovetailed drawers and full-extension, under mount, ball bearing drawer guides with soft-close features.

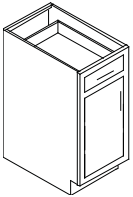

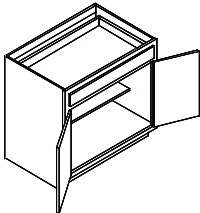

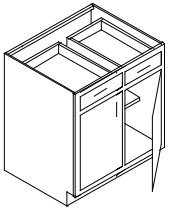

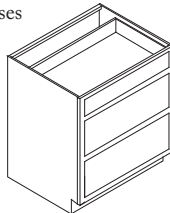

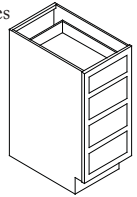

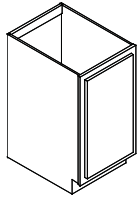

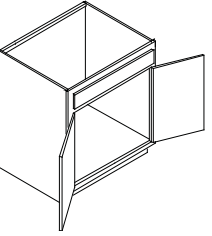

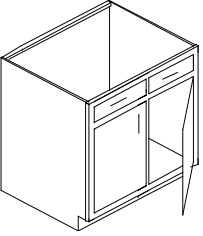

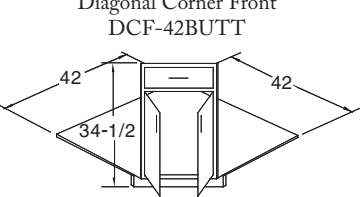

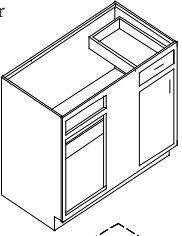

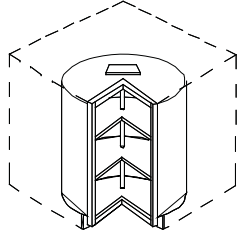

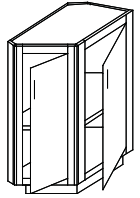

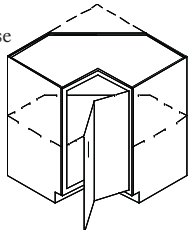

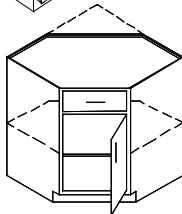

Drawers are the most used feature on your cabinetry. This new upgrade choice allows you to choose a true custom-styled drawer in a budget-conscious kitchen.

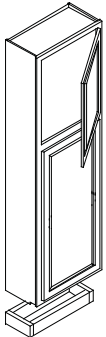

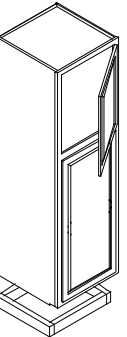

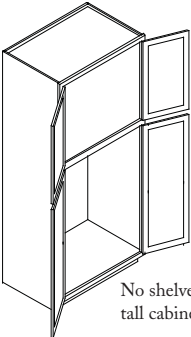

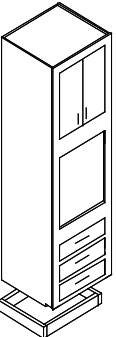

Drawer Upgrade Comparison
